

Constructing a Living Building

This book is planted on 100% recyclable paper and is implanted with seeds. Once use is completed, the book can be planted and wildflowers will grow!

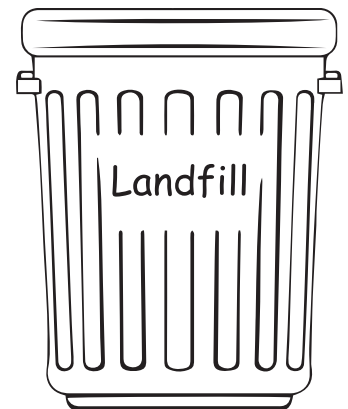

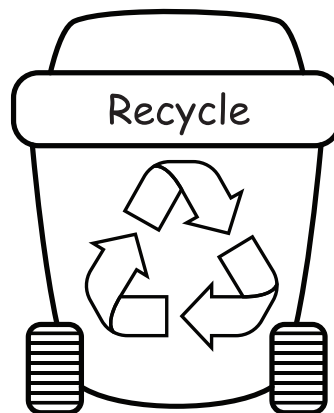

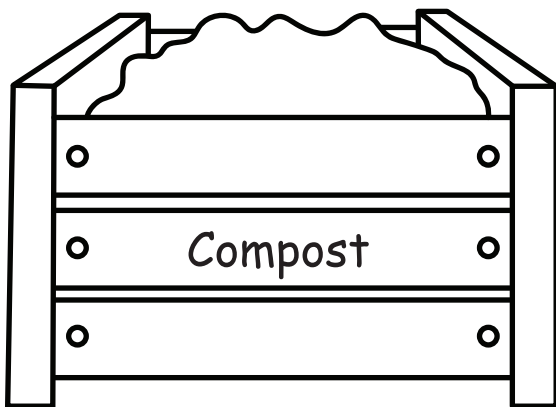

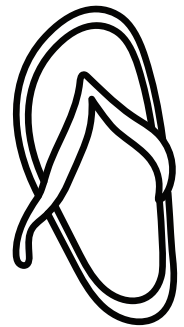

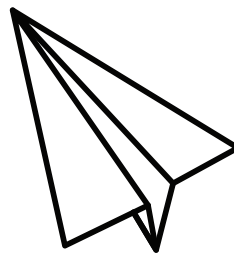

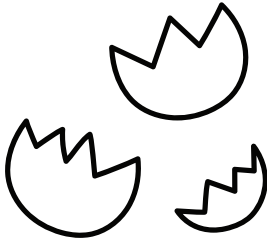

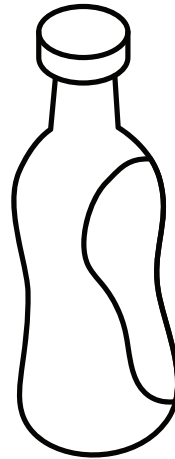

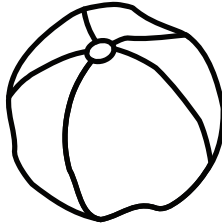

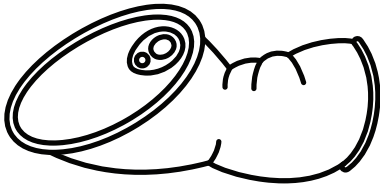

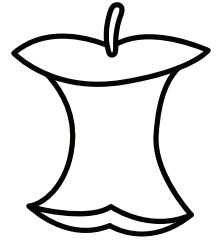

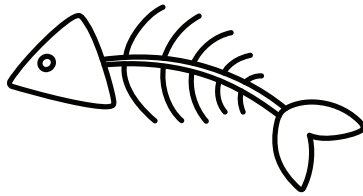

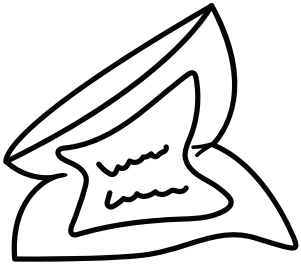

During construction we will protect
the land and the creatures.

Eating healthy foods that we grow ourselves is like giving our body a superhero's shield, protecting us and giving us the power to play, learn, and grow strong!

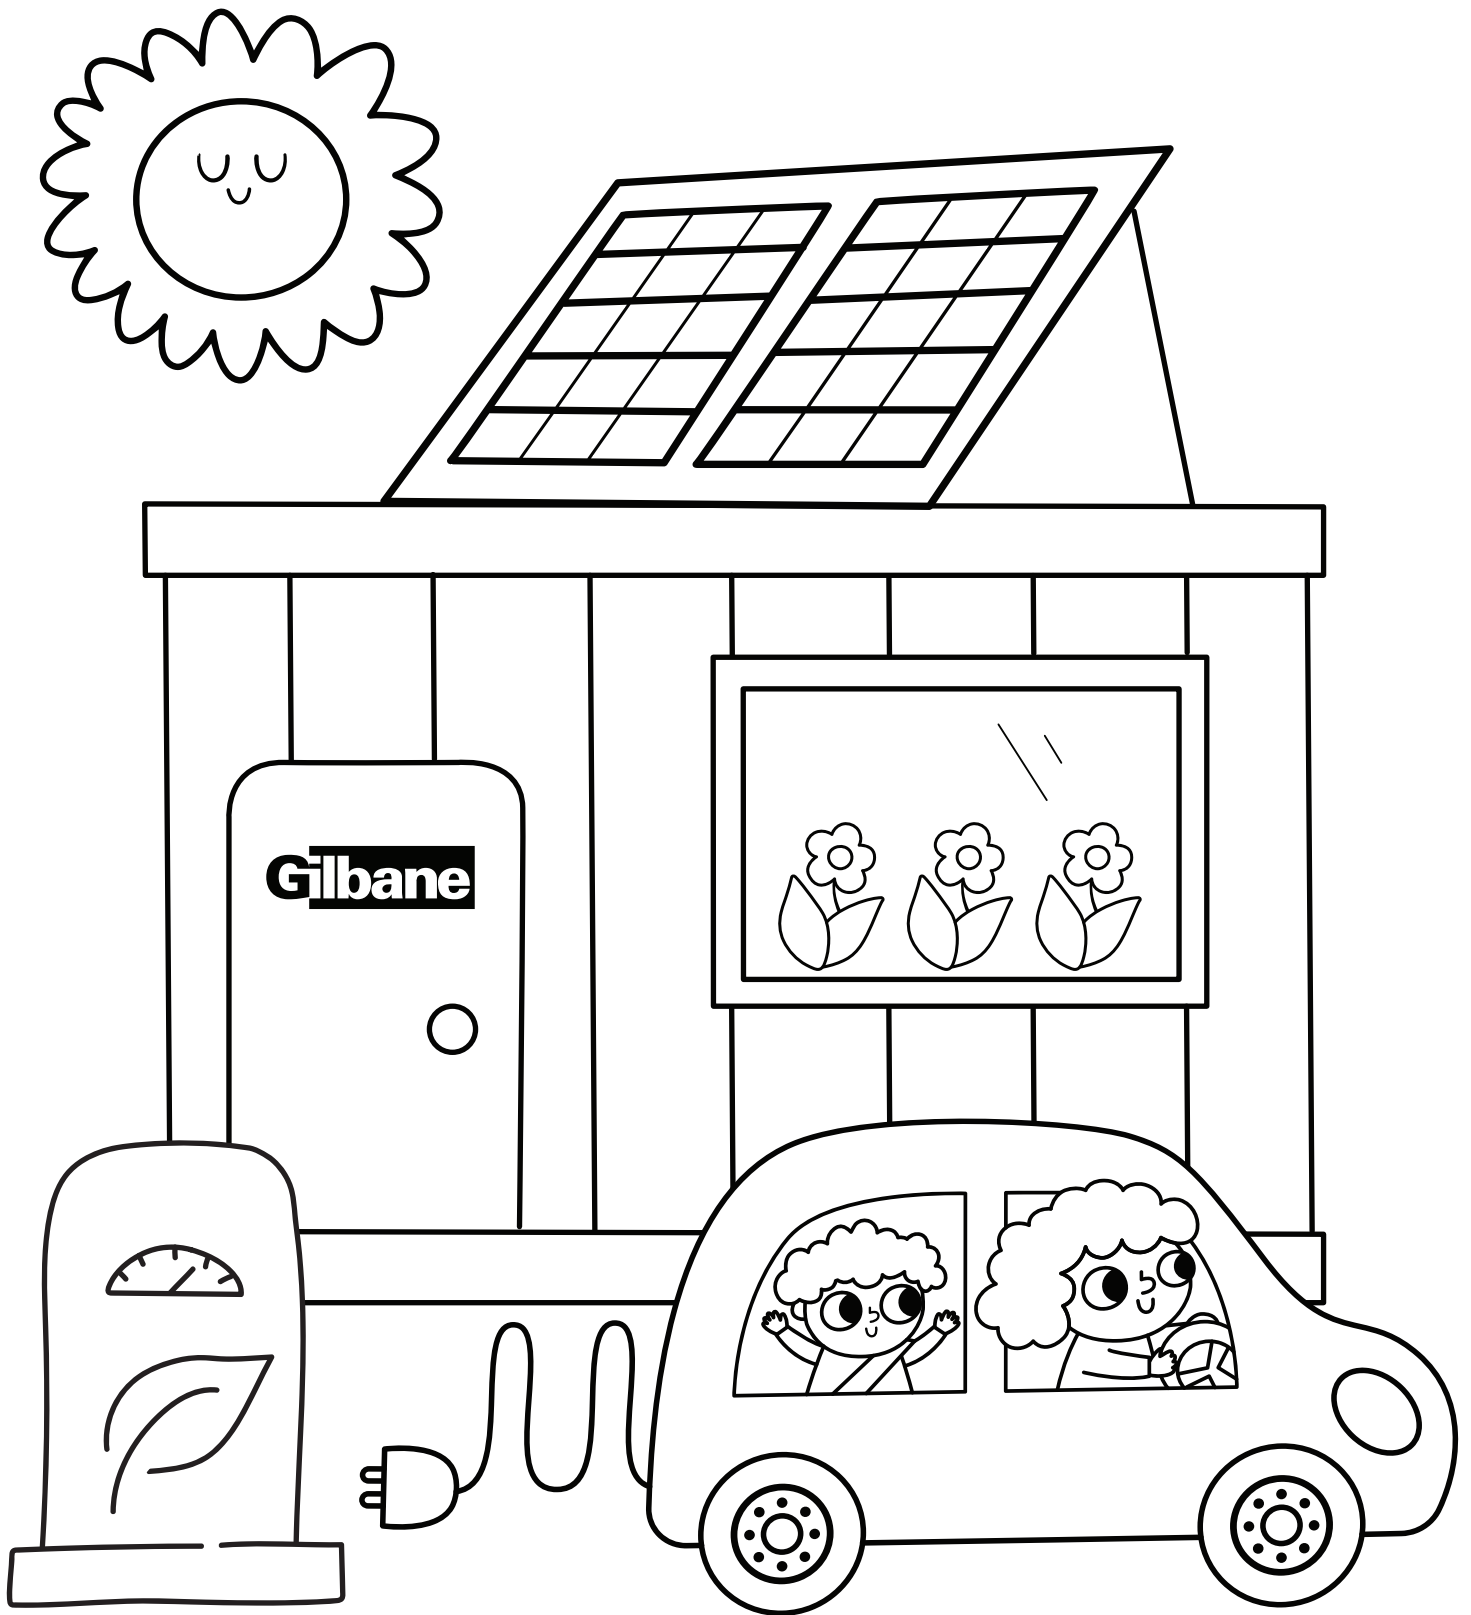

Match the item with it's appropriate waste bin

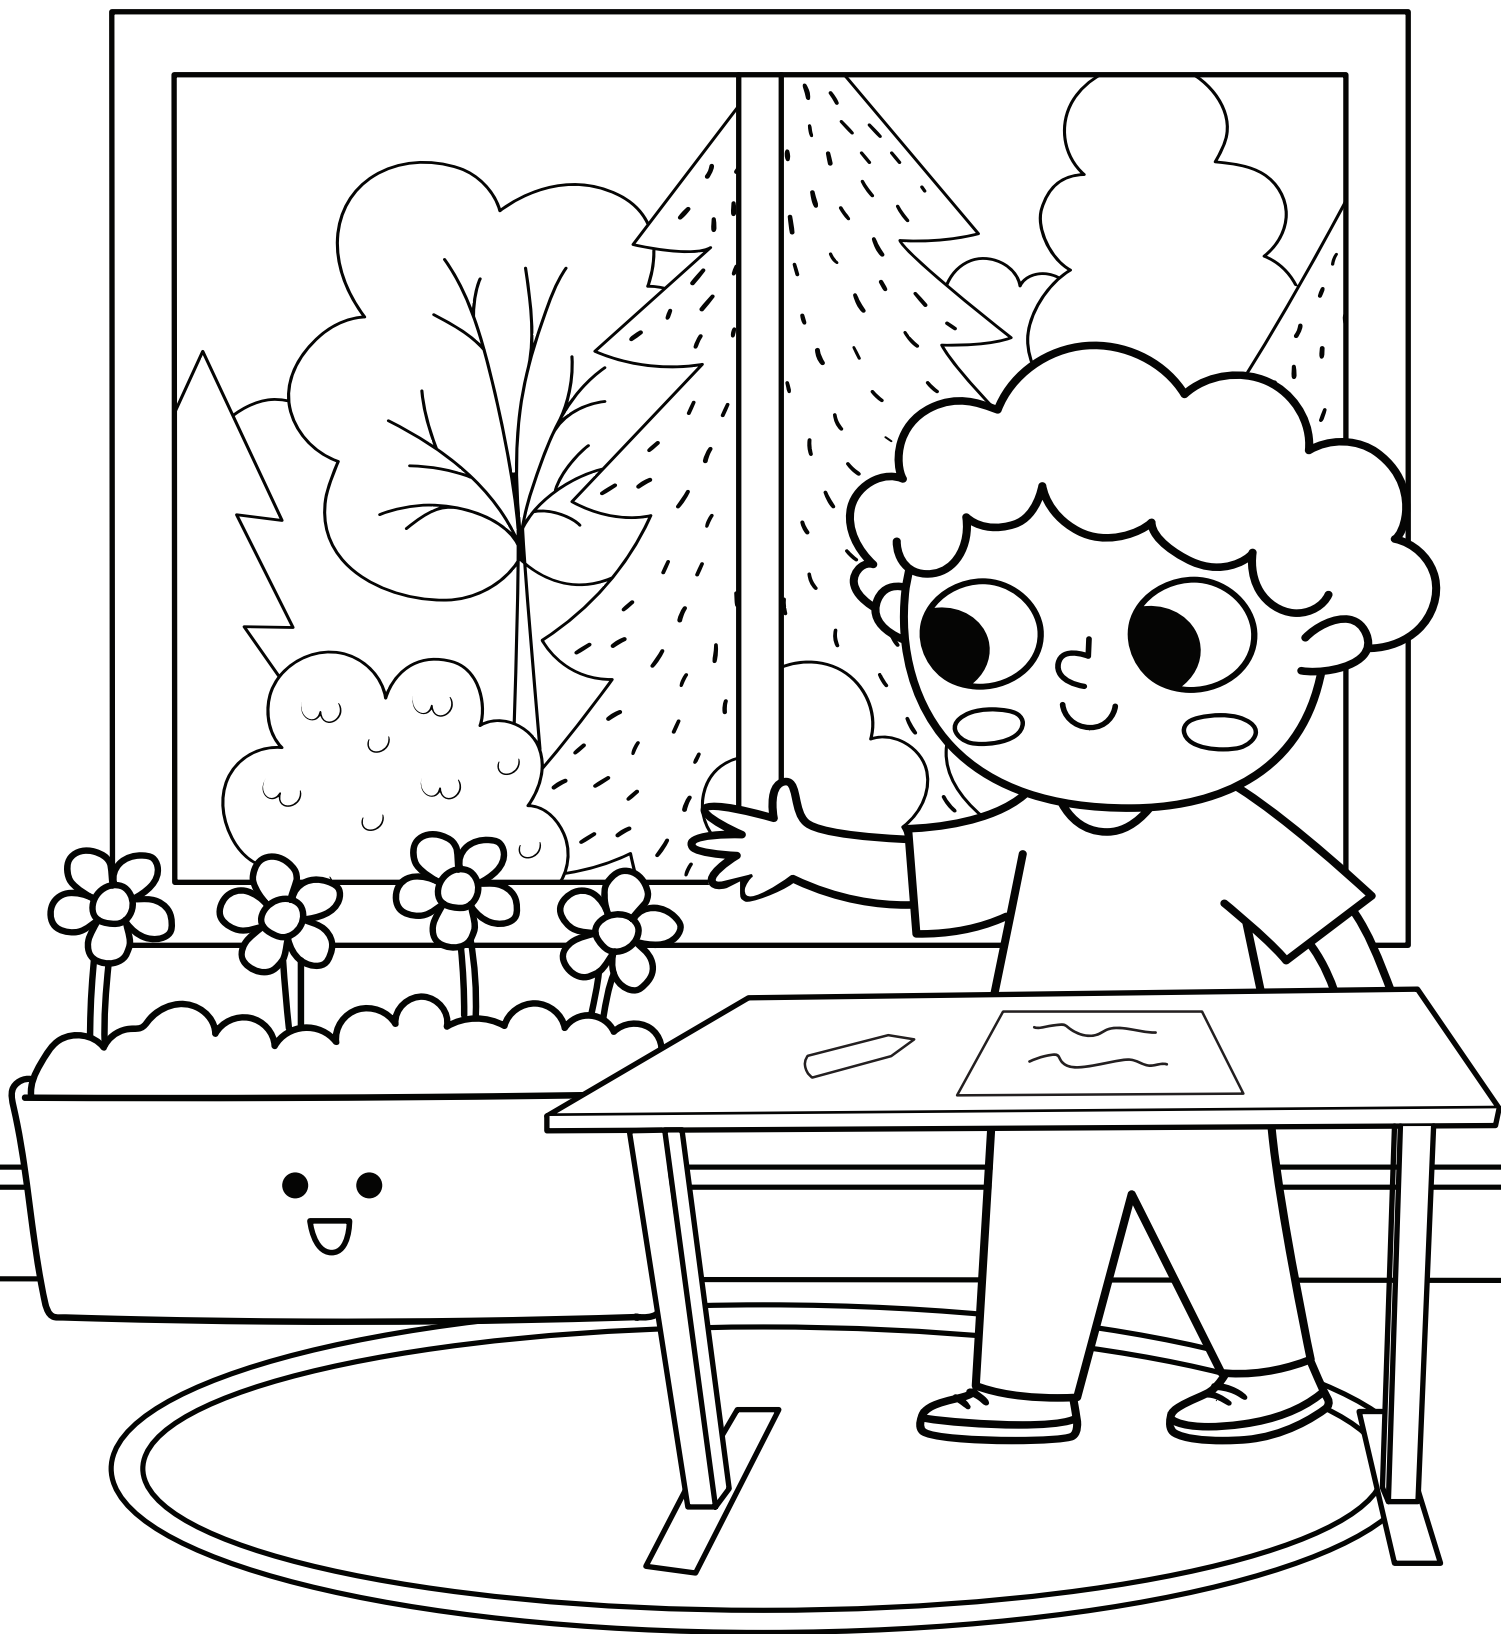

Composting is like giving the Earth a vitamin;
it turns our leftover peels and leaves into
healthy soil to grow new plants!

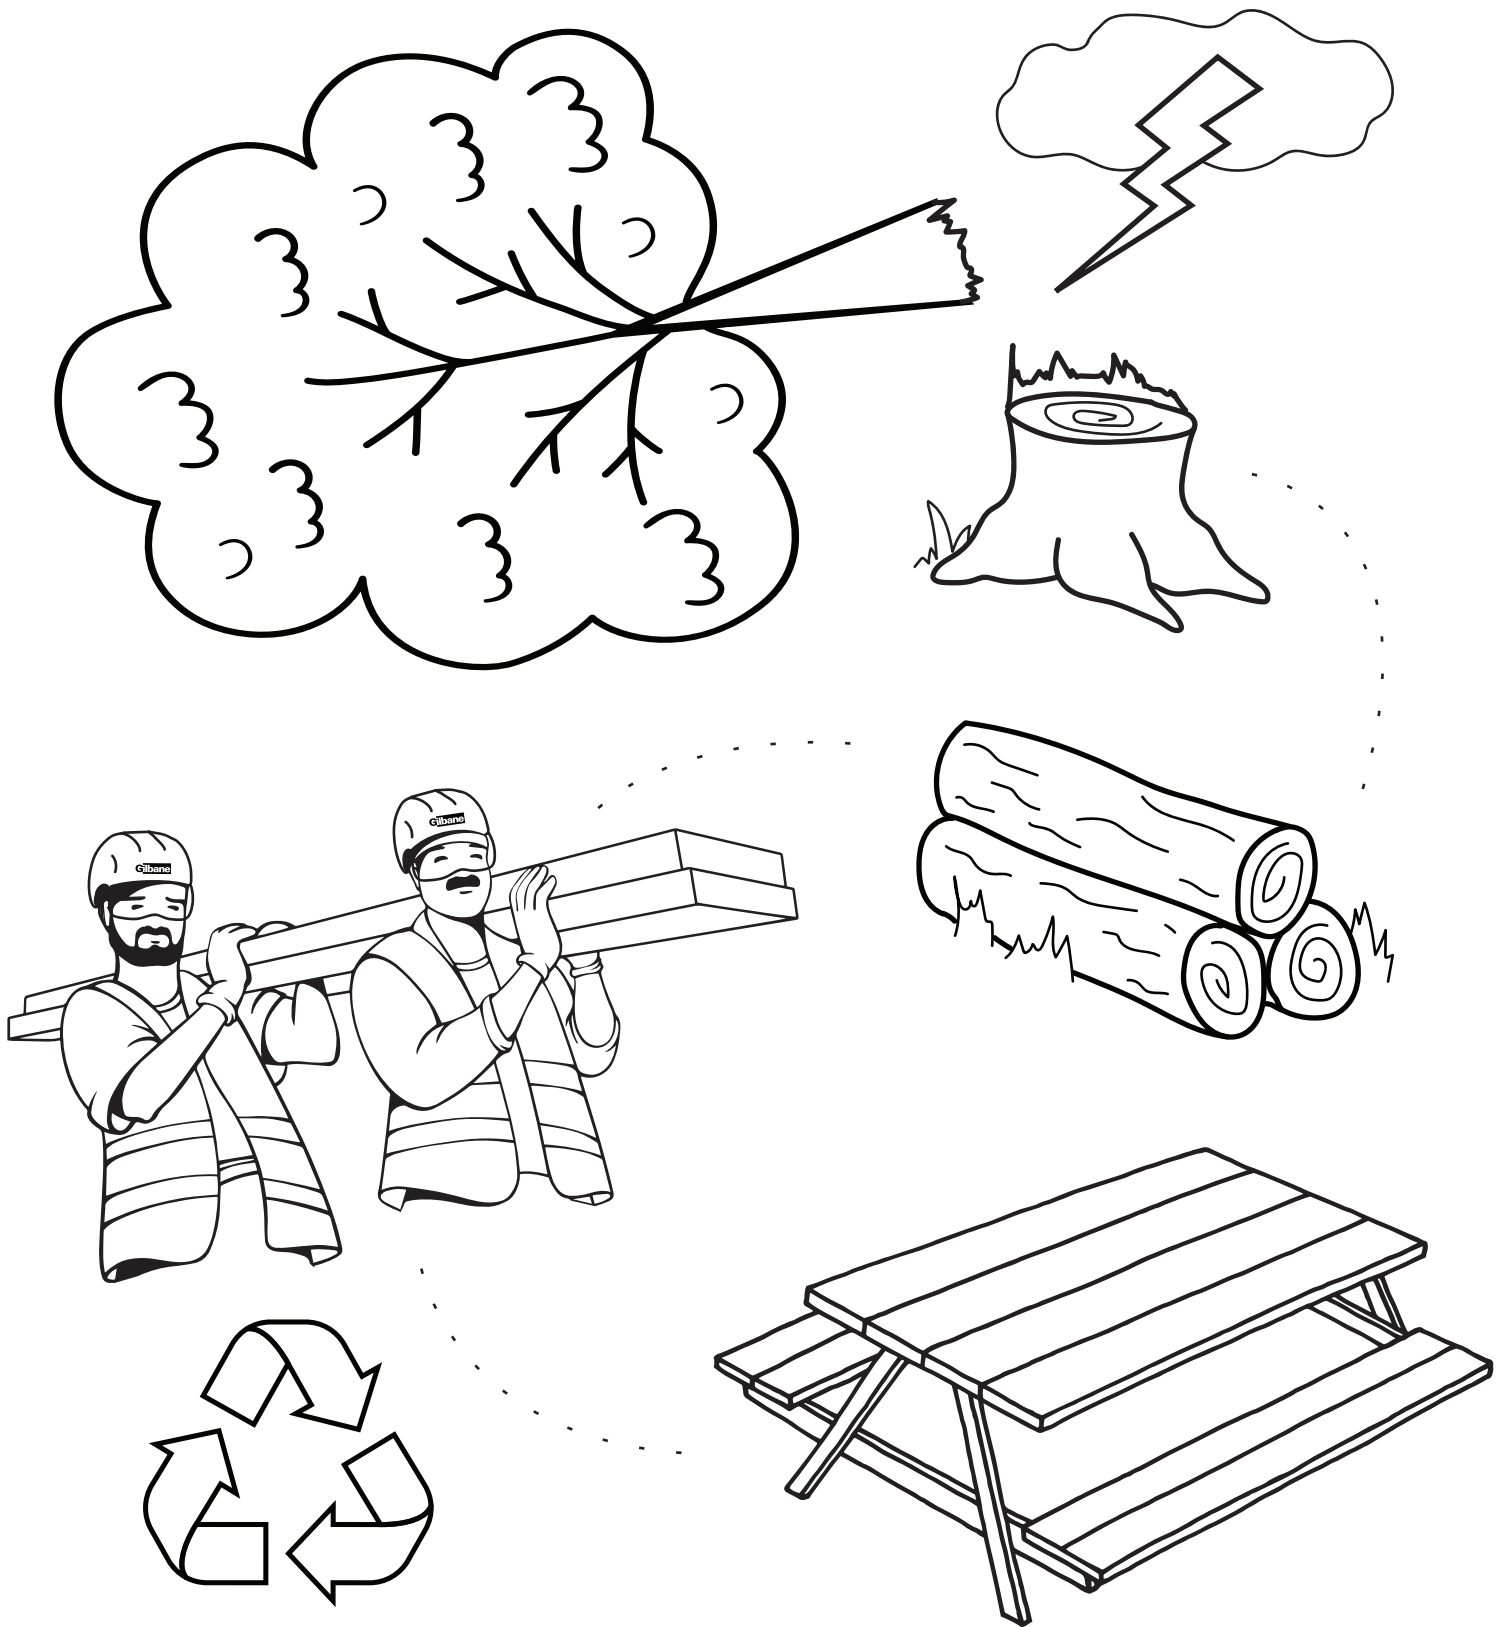

Connect the dots to make the gutter
that collects rain water for our gardens
and once filtered, for us to drink!

By using solar panels, we take the sun's power and turn it into clean electricity to help save the Earth!

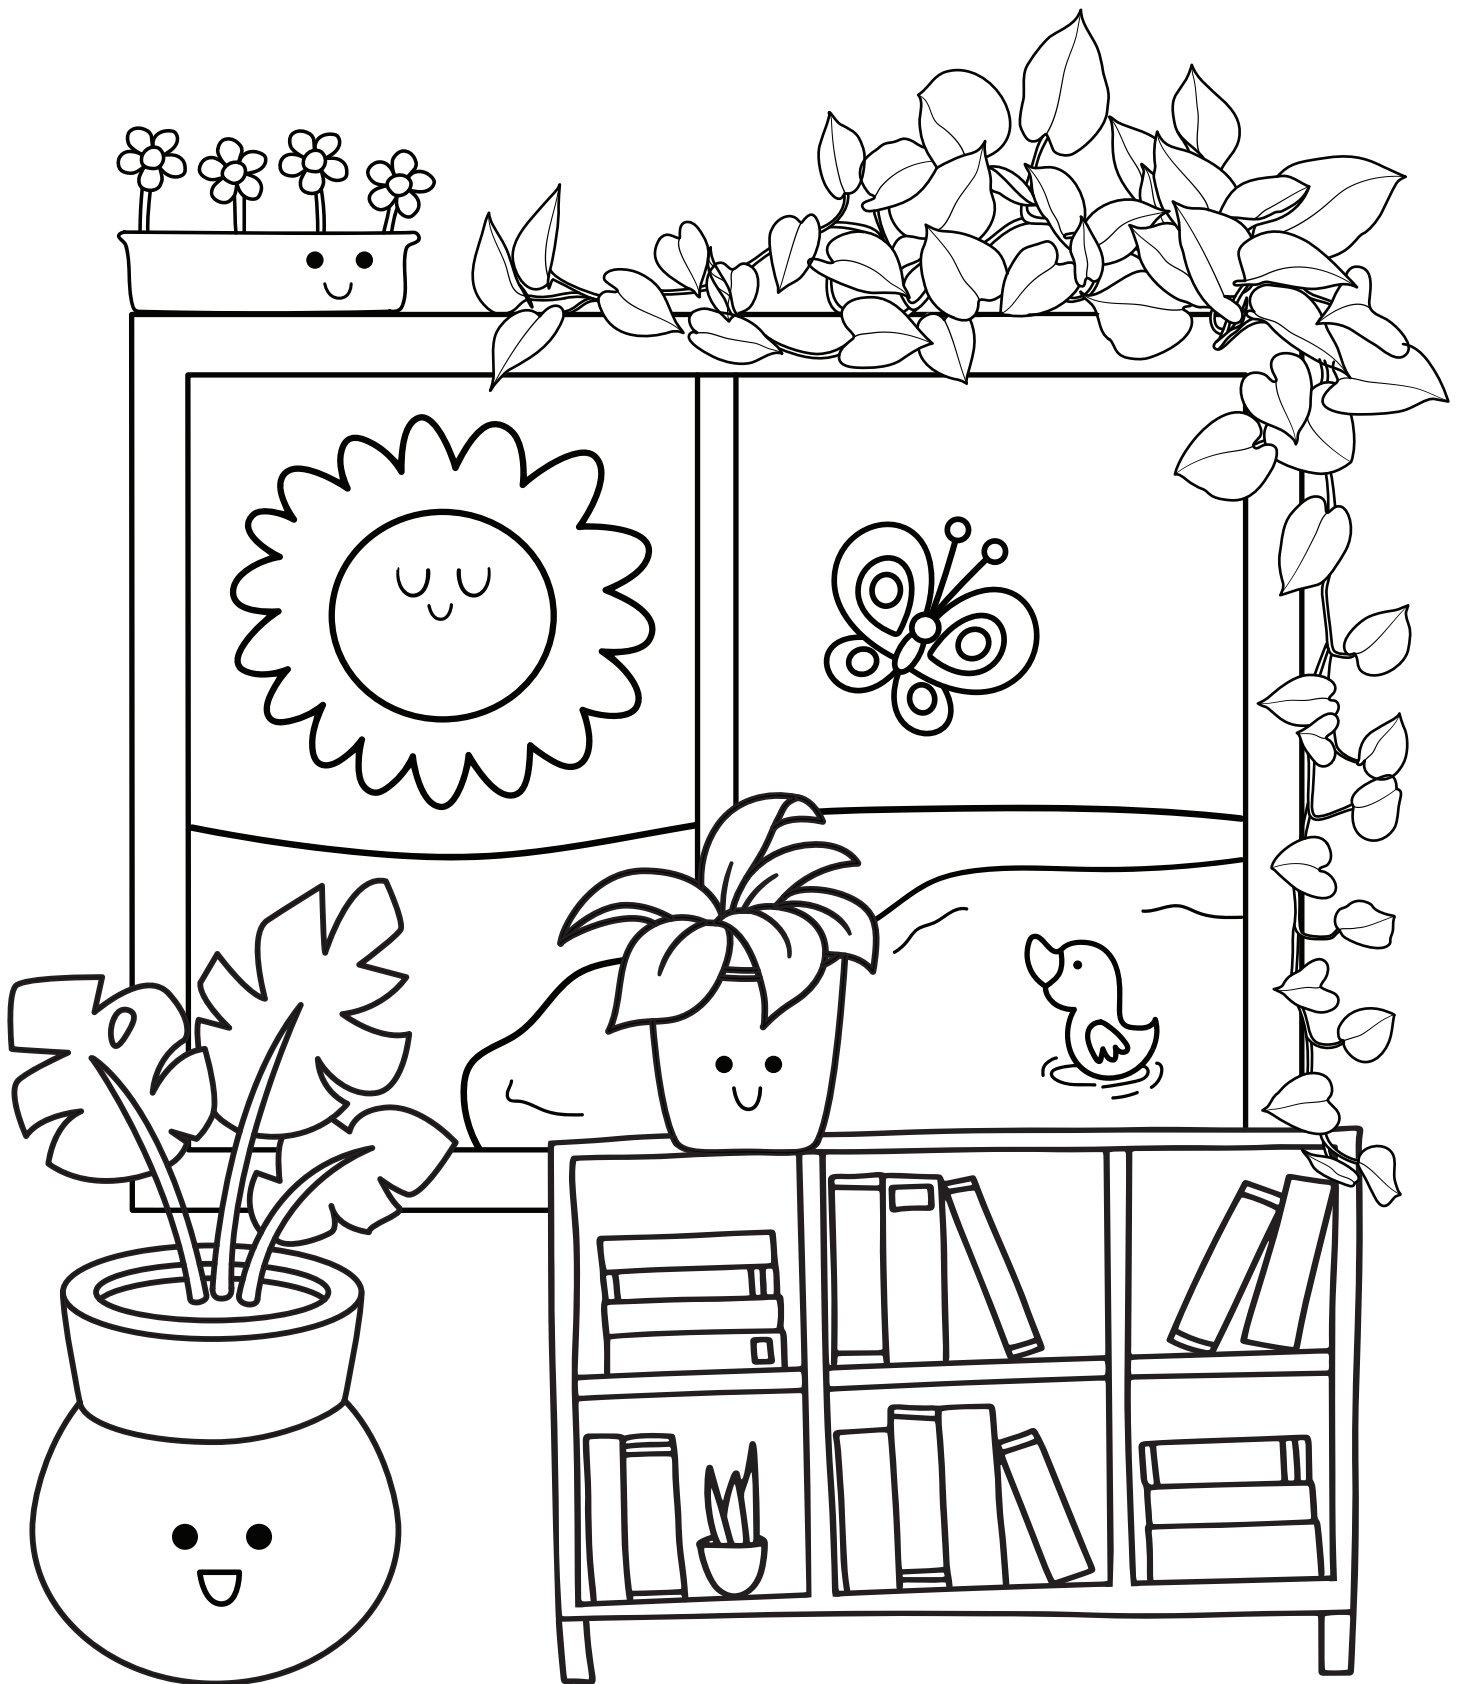

Promoting an active workspace by using standing desks and having views of nature allow for a more positive learning environment.

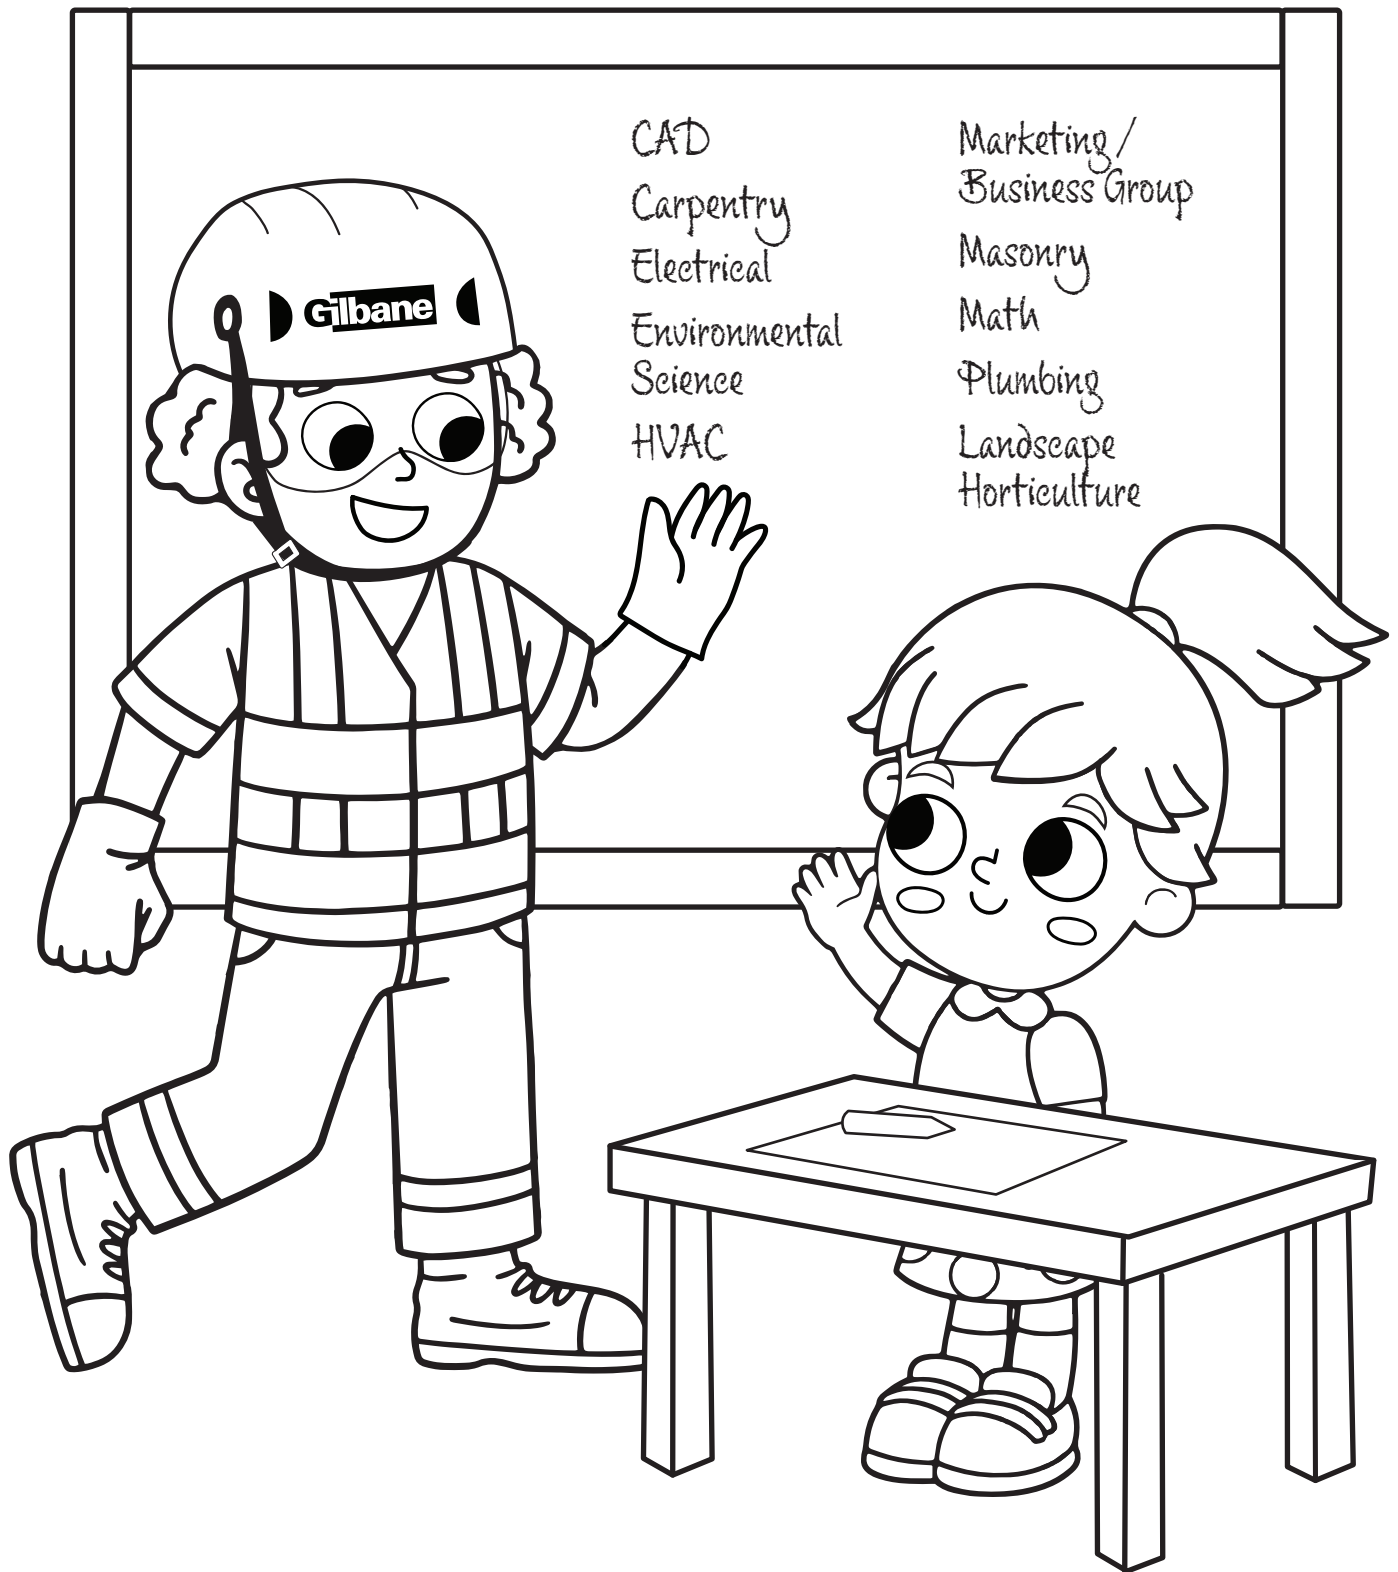

Fallen trees can be reused to create tables,
shelves and even stairs!

We will construct an environment
that is accessible to everyone!

Access to outdoor views and daylight has a direct effect on people's productivity, their creativity, and their ability to counter stress.

Gilbane looks forward to partnering with HCPS to utilize appropriate CTE clusters during the construction of this project.
